EDUCATION

Higher University of San Simon
Bachelor's Degree in Systems Engineering

Cochabamba, Bolivia

EXPERIENCE

New Vision Data
Senior Frontend Developer

Remote
Feb 2026 – Present

- Develop and maintain enterprise RFID device management platforms using React and TypeScript, supporting hardware ecosystems and large-scale operational workflows. .
- Contributed to modernization involving MicroUI architectures and migration toward a new UI platform, collaborating on design system implementation through Sass Modules and shared theming strategies.
- Collaborated with US clients and distributed engineering teams across multiple countries to deliver enterprise-scale frontend solutions.
- Migrated legacy Vue 2 applications to Vue 3 for NFL-related analytics platforms, improving maintainability and long-term scalability.

New Vision Data
Lead Frontend Developer

Remote
Feb 2025 – Jan 2026

- Led frontend development for administrative web applications, ensuring scalable architecture and high-quality UI delivery using React and TypeScript.
- Coordinated engineering efforts across frontend, backend, and mobile teams, aligning technical execution with business requirements and delivery timelines.
- Established development processes including sprint planning, coding standards, PR reviews, ticket workflows, reporting structures, and technical discussions to improve team efficiency.

AssureSoft S.R.L
Full Stack Developer (Frontend Focused)

On Site
Oct 2022 – Jul 2024

- Developed and maintained web and mobile solutions using React, JavaScript, PHP, Kotlin, and Android technologies, contributing to scalable and maintainable products.
- Built features for global e-commerce platforms and mobile applications, including social-style experiences, video-based functionality, and user-focused interfaces.
- Improved application performance and technical sustainability through optimization initiatives, caching strategies, profiling, and Node.js migration efforts.
- Collaborated with US-based clients and cross-functional teams to align technical implementation with business objectives.

Higher University of San Simon
Full Stack Developer (Frontend Focused)

On Site
Feb 2022 – Jan 2023

- Co-developed an information system serving over 75,000 university students, enabling business promotions, analytics, and platform management capabilities.
- Built responsive frontend experiences using React and TypeScript while implementing backend functionality with PHP (Yii2) and Node.js services for notifications and real-time communication.

- Developed features for user management, reporting, and statistical analysis, contributing to operational efficiency and data-driven decision-making.

SKILLS & INTERESTS

Frontend: React, Angular, TypeScript, JavaScript, TanStack, Redux, MaterialUI, Bootstrap, TailwindCSS, SASS

Backend: Node.js, PHP, Java

Mobile: Kotlin, Jetpack Compose, Android

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, Jira, Figma, Jenkins, Postman, DBeaver, AWS

Interests: Board games, volleyball and painting.

CERTIFICATIONS

English Speaking Test B2+ – SmallTak2Me

Certified Frontend Developer (React) – HackerRank

JavaScript (Intermediate) – HackerRank
